

At Vallabh we follow the philosophy of inclusive growth and aim to achieve perfection in all avenues.

With a humble beginning, Vallabh is determined to reach and sustain a position of leadership.

It will be a force to reckon with for setting trends based on the values and principles of the Group.

The prime focus is on customer satisfaction through consistent and dependable quality of products and services.

People development by emphasising on safety, harmony with confidence, innovation and continuous improvement, Vallabh provides a fair opportunity to each one to beat their best for growth through transparency, trust and honesty.

Vallabh cares about society through efforts to conserve and improve the environment and energy.

Always takes associates into confidence through knowledge sharing, care and concern for mutual benefit.

### Happiness for all through

## Vallabh

The Group founded in the year 2000 fosters a vibrant legacy of innovation, continuous technology up-gradation, and growth with a customer centric approach in all aspects of business. With its first office at Indore in Madhya Pradesh in Central India, today Vallabh Group is proud of its global presence with exports to multiple countries.

Under the adept and dynamic leadership of Mr. Vipin Jain, the Group has become a leading corporate citizen in its segment while following its core objectives and principles of inclusive growth for all. The growth strategy of Vallabh has been to be associated with businesses which support the fundamental needs of the people and also contribute towards the betterment and well-being of the society. As a result, Vallabh Group of companies is involved in the field of Agricultural Equipment and their derivatives, Stainless Steel and environment friendly Submersible Pumps also.

With expertise in our core areas, Vallabh continues to build on its growth and value creation legacy for all its customers, vendors, associates, and stakeholders.

# Vallabh

## The Growth Journey Continues...

### Our Team

The Vallabh team of professionals with their experience and expertise, are proficient in understanding the changing needs of customers and develop and manufacture best-in-class products. Quality First and Customer Foremost is the guiding principle for us. Adapting to latest technology trends, our team is tuned to provide the best possible aftermarket service to customers.

## Quality First, Customer Foremost

For our success and continuous growth we are indebted to our customers. The growing number of loyal customers proves that "Once a Vallabh customer always a Vallabh customer".

To ensure development of best-in-class products that meet global quality standards, we consistently adapt latest technology. Our ability to understand rapidly changing customer needs and market trends and come out with qualitatively superior products keeps us ahead of others.

Customer feedback, for Vallabh Group, is a constant source of inspiration to continuously improve our product and service offerings.

## Our Products

### Submersible Motors

We manufacture and export wide range of energy efficient and high performing Submersible Motors, ideal for agricultural and domestic applications.

Speciality	Robust Construction, Easy to Use, High Efficiency, Reliable
Product Range	4" Motor Series
	6" Motor Series
	8" Motor Series
	10" Motor Series
Certification	CE Certified
Voltage	220V to 480V

#### Features

- High operating efficiency with lesser power consumption
- Water cooled rewindable motor
- Easy to dismantle and repair
- Industry standard NEMA mounting dimensions
- Cable material according to drinking water regulations
- SIC shaft seal for maximum sand protection
- Optional PT 100 Sensor
- Easy to mount with double flange
- Mech. Seal: Sic vs Sic/Optional

## Stainless Steel 304 Submersible Pumps

Complete range of Submersible Pumps (50Hz & 60Hz) with high quality, energy efficient and superior performance, best suited for agricultural applications.

Product Range	Features
100mm well size (4")	High operating efficiency
150mm well size (6")	Highly durable & hygienic
200mm well size (8")	Good resistance to sand & aggressive water
250mm well size (10")	Can be easily dismantled & repaired
300mm well size (12")	Can handle up-thrust load
360mm well size (14")	100% fabricated stainless steel pumps

## Submersible Column Pipes

These pipes have been specially designed and manufactured under stringent quality standards. They are tested to withstand system load comprising pump, water and pipe weight with adequate factor of safety. Due to unique design of square threads, they can withstand considerable shock and jerk load during operation. Pipes supplied with separate couplers are integrally locked with the pipes. "Vallabh Pumps" column pipes for submersible pump offer many advantages like lightweight, high tensile load capacity, leak proof joints and long life with economy and hence emerge as the best option for conventional metal pipes. These pipes are available in 25mm to 100mm (1" to 4") in different classes like light duty, medium duty, standard duty, heavy duty for varying needs based on installation depths 100 mtrs. to 350 mtrs.

### Features

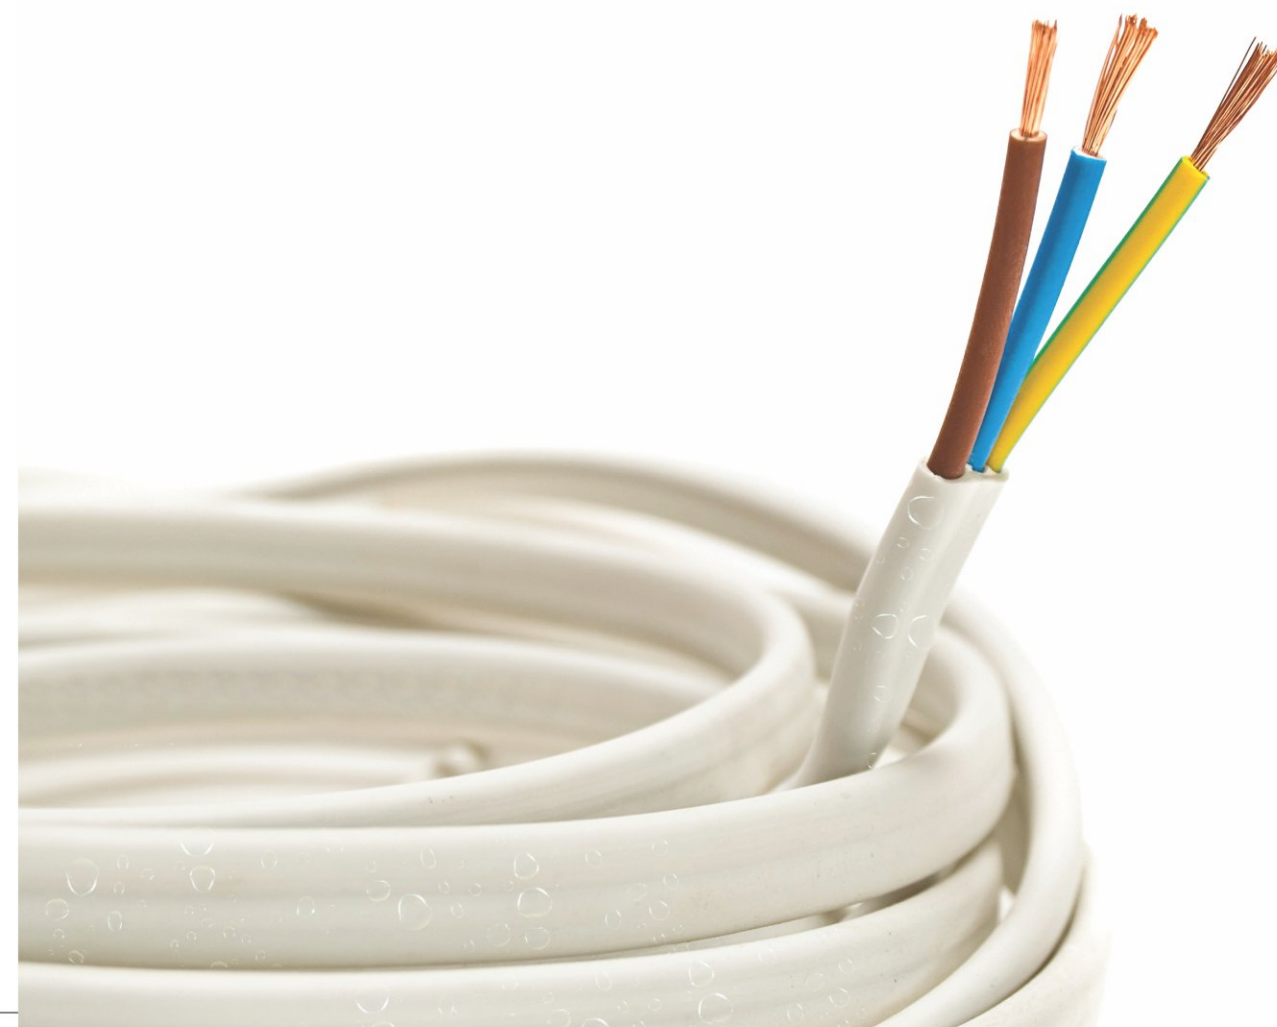

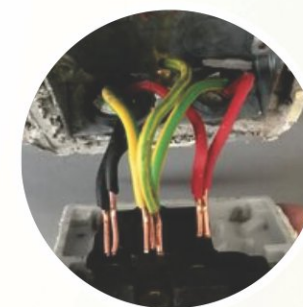

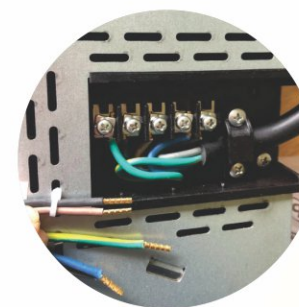

- Long life with max. load capacity
- Light in weight & easy to transport
- Easy and low installation cost
- Cost effective & power saver
- 10 to 30% extra water due to smooth inner surface
- No electrolytic deposition, rusting or corrosion

## Cables

Premium flexible copper conductor wires for a wide range of applications. For continuous use in deep well to supply power to submersible motors for the depth upto 500 mtrs.

Product Range	
<b>Conductor</b>	Finely Stranded Bare Flexible Copper Conductor
<b>Insulation</b>	PVC
<b>Sheath</b>	PVC
<b>Core</b>	3 Core (red, yellow, blue or brown, blue, black) 4 Core (red, yellow, blue, green or brown, blue, black, yellow with green line or green with yellow line)
<b>Features</b>	Excellent resistant to moisture, abrasion, grease, oil Excellent mechanical & electrical properties Temperature range - 15°C to 70°C

## Copper Winding Wires

Vallabh Submersible Winding Wires are made of best quality EC grade copper procured from Hindalco. Annealed efficiently for easy winding, it has excellent electrical, mechanical, thermal & chemical properties. These wires are insulated with premium quality electrical grade polyester providing it excellent resistance. Further it is insulated with bi-axially oriented polypropylene films. With adherence to IS-8783 (Part 4/Sec. 3), ultra soft and minimal leakage current makes Vallabh Wires unique.

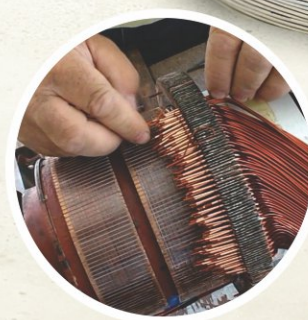

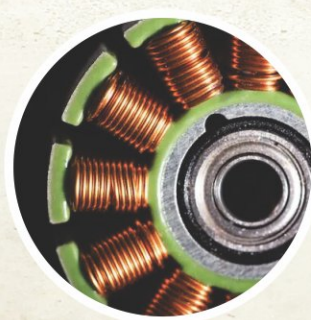

<b>Thickness</b>	0.5 mm
<b>Application</b>	Industrial use
<b>Purity</b>	99%
<b>Certification</b>	ISI certified
<b>Packaging Type</b>	Plastic roll

### Application

Submersible Winding Wires are used in submersible pumps and motors of all sizes for domestic and industrial application.

### Special Features

- Saves energy - ETP grade high conductivity annealed copper used
- Minimal leakage current - high insulation resistance
- Tear resistant - high mechanical strength - high tensile strength
- Each coil tested at 4000V
- Heat shock test - at 150°C
- Easy winding

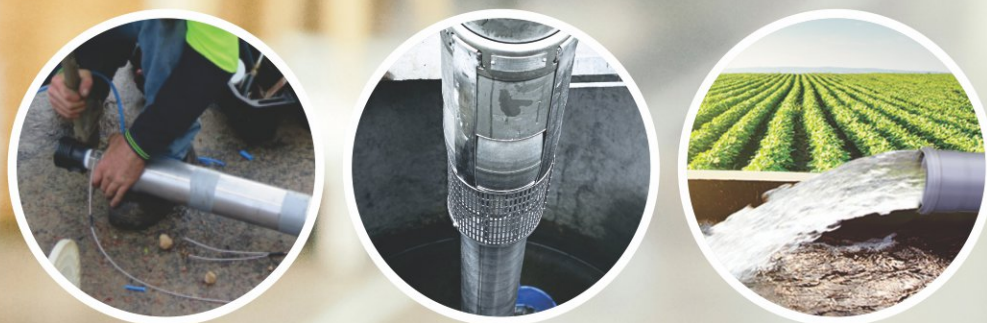

## uPVC Column Pipes Accessories

Our accessories carry the Vallabh mark of quality. Top-Bottom Adapter sets are available in cast iron and stainless steel in the range of 1" to 6".

<b>Metal</b>	Cast iron
<b>Diameter</b>	1" to 6"
<b>Finishing</b>	Steel chromium coated
<b>Thickness</b>	5mm to 12mm
<b>Connection</b>	Square thread / pipe thread
<b>Application</b>	Connection of submersible pump sets and column pipes

## Spare Parts

As part of its after-sales support, Vallabh Group supplies genuine and quality spare parts for the smooth and seamless functioning of its Submersible Motors and Pumps. We also ensure regular supply and easy availability of spare parts nearer to the customers.

# Commitments

Commitment to **Quality**

Commitment to **Customers**

Commitment to **Technology**

Commitment to **Employees**

Commitment to **Suppliers & Associates**

Commitment to **All Other Stakeholders**

Commitment to **Society**

Commitment to **Meet and Exceed Customer Expectations**

Commitment to **Expand and Contribute to Industrial Growth of the Region**

Commitment to **Follow Ethical Business Practices**

Commitment to **Transparency**

Commitment to **Statutory Compliance**

Commitment to **Partnering Prosperity**
